Introduction

This Medical Fee Schedule establishes the maximum fees that may be paid to health care providers for the treatment of disabled individuals eligible for medical and dental services provided under the auspices of the New Hampshire Department of Education, Bureau of Vocational Rehabilitation.

This publication includes fees for specific medical professional services identified using *Current Procedural Terminology* (CPT[®]) identifying codes and modifiers for reporting medical services and procedures as established by the CPT, copyrighted by the American Medical Association (AMA) and the Healthcare Common Procedure Coding System (HCPCS).

This fee schedule was developed and designed to ensure a reasonable cost to the Bureau of Vocational Rehabilitation for all medical and dental fees while ensuring the fees were not so low as to effectively deny services. If comparable services or benefits exist under any other program and are available to the program participant at the time services are needed, NHVR must use those services or benefits to meet, in whole or part, the costs of the vocational rehabilitation services.

Definitions

CPT code

Current Procedural Terminology (CPT) is a set of codes maintained by the American Medical Association. The CPT code set is designed to communicate uniform information about medical services and procedures among physicians, coders, patients, accreditation organizations, and payers.

Description

Descriptions are provided by the AMA to identify the procedures and services associated with each CPT procedure code.

Rate

The rate is the maximum reimbursement amount for each listed procedure.

By Report (BR)

BR, an abbreviation for “by report,” appears in the rate tables on the following pages for services or procedures that are rarely performed or are variable in nature. Additional information is required to determine how much will be reimbursed for these procedures. Providers billing for these services should submit the bill accompanied by a report that explains the service that was provided.

Modifier

Modifiers (abbreviated Mod in the headings on the rate tables on the following pages) are used by providers to indicate special circumstances affecting the service or procedure that was provided. The following modifiers are used in this fee schedule:

- **Modifier 26** – Modifier 26 is used to indicate that the service being billed is for the professional component of the service only. Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service is identified by adding modifier 26 to the usual procedure number. This is commonly used when billing for diagnostic tests, including radiological procedures.
- **NU (New)** – Modifier NU is used with durable medical equipment and supplies and indicates that the equipment being billed is new.
- **UE (Used)** – Modifier UE is used with durable medical equipment and supplies and indicates that the equipment being billed is used.
- **RR (Rental)** – Modifier RR is used with durable medical equipment and supplies and indicates that the equipment being billed is rented.

Anesthesia

Anesthesia services are billed based on a number of factors, including the complexity of the service, the time spent administering anesthesia and monitoring the patient and the overall physical health of the patient.

- **Complexity:** The American Society of Anesthesiologists provides base units for each anesthesia code that reflect the complexity of providing the service.
- **Time:** Anesthesia time is typically measured in 15-minute increments, with one time unit per 15 minutes of anesthesia time.
- **Health:** Additionally, the overall health of the patient is measured by applying physical status modifiers.
 - 0 units - healthy patients or those with mild systemic disease, however
 - 1 unit - patients with severe systemic disease,
 - 2 units - patients with severe systemic disease that is a constant threat to life and
 - 3 units - moribund patients who are not expected to survive without the surgery

The anesthesia rates provided on the following pages are based on these assumptions:

- The patient is generally healthy; therefore, no units have been applied based on the physical status of the patient.
- Anesthesia time is defined as the period during which an anesthesia practitioner is present with the patient. It starts when the anesthesia practitioner begins to prepare the patient for anesthesia services in the operating room or an equivalent area and ends when the anesthesia practitioner is no longer furnishing anesthesia services to the patient, that is, when the patient may be placed safely under postoperative care. Anesthesia time is a continuous time period from the start of anesthesia to the end of an anesthesia service. Actual anesthesia time in minutes is reported on the claim. For anesthesia services furnished, time units are computed by dividing reported anesthesia time by 15 minutes, and rounding the time unit to one decimal place. The Centers for Medicare & Medicaid Services (CMS) anesthesia time in minutes is displayed in the last column of the table.

Anesthesia services will be reimbursed up to the maximum rates provided in the table based on the CMS anesthesia time. However, if the actual anesthesia time exceeds the CMS anesthesia time and/or the patient has a systemic disease that will affect the anesthesia billing, the New Hampshire Bureau of Vocational Rehabilitation may authorize higher payments to the provider.

Surgery

The codes in this section reflect surgical services and are based on a global surgical package which includes all the necessary services normally furnished by a surgeon before, during, and after a procedure. Payment for a surgical procedure includes the preoperative, intra-operative, and post-operative services routinely performed by the surgeon or by members of the same group with the same specialty. Physicians in the same group practice who are in the same specialty must bill and be paid as though they were a single physician. The global surgery indicator and post-operative periods for covered surgical procedures are defined by Centers for Medicare & Medicaid Services (CMS).

Radiology

The codes in this section reflect diagnostic and therapeutic radiology services. Rates are provided for the global service, and when applicable, a separate rate is provided for the professional component, which is noted by 26 in the modifier (Mod) column.

The global fee is billed when the service includes the technical component—services of the technologist, use of the equipment, and facility resources—in addition to the professional component that reflects the physician’s services to read and interpret the results.

Pathology and Laboratory

Services in this section reflect pathology and laboratory procedures that are used to evaluate the nature of disease or a change in organs and body tissue related to injury or disease. The fees listed in this section include recording of the specimen, performance of the test, and reporting of the result. Services in this section cover tests such as clinical laboratory tests, urinalysis, drug screening and other tests.

Health Care Procedure Coding System (HCPCS)

HCPCS is an acronym for Healthcare Common Procedure Coding System. HCPCS Level II codes and descriptions are developed and maintained by the Centers for Medicare & Medicaid Services (CMS) and include codes for procedures, equipment, and supplies not found in CPT. HCPCS covers categories of procedures and services including ambulance services, durable medical equipment, selected pharmaceuticals, prosthetics and orthotics, supplies and more.

Some of the equipment and supplies billed with HCPCS codes can be purchased new or used, or in many cases rented. Modifiers NU (new), UE (used) and RR (rented) are included in the rate tables as applicable.
