| School Mission: | To empower our students with opportunities to master technical skills, both practical and theoretical, in the context of a high school and early college program that emphasizes the dignity and value of work. Students will discover an appreciation for the power of the sciences combined with an understanding of the humanities. They will develop into innovative problem-solvers ready to enter the technical careers of their choice upon graduation or through further study. |
| Purpose: | To ensure that all students are safe using technology and that all student data is protected. |
| Summary: | We completed a full cybersecurity assessment and developed a plan of action on what steps need to be addressed immediately and what are the next steps. Review of all policies and procedures to make sure that everything is up to date and supported is also conducted. |
