New Hampshire Department of Education Bureau of Student Support Monitoring Review for Approval of Private Provider Special Education Programs

> St. Charles School Summary Report 2019 – 2020

Sister Mary Agnes, Executive Director Charlene Shields, Special Education Administrator

> Coordinating Education Consultant; Rebecca Fredette

Monitoring Visit Conducted on February 18, 2020 Report Date: March 20, 2020

Overview of the St. Charles School Program

The St. Charles School program is a New Hampshire Department of Education, Bureau of Student Support Approved Special Education Program located on 19 Grant Street in Rochester, New Hampshire. The program is approved for 24 male and female students in grades K through 8. Students enrolled in this program have primary disabilities in the areas of Autism, Developmental Delay, Emotional Disturbance, Intellectual Disability, Other Health Impairments, Specific Learning Disability, and Speech-Language Impairments.

St. Charles School provides academic, social, emotional and behavioral services in a therapeutic setting. Due to their decades of experience supporting child trauma survivors, St. Charles School is uniquely positioned to work with children who display severe behavior in the typical classroom. Using proactive problem solving in which students are empowered to express their needs and concerns, St. Charles School helps students to understand themselves and their behavior. The safe and nurturing environment provided helps students heal, build meaningful connections and over time, acquire the skills and positive behaviors necessary to function successfully in a classroom environment and eventually reintegrate into traditional school environments.

St. Charles School's mission is to provide a safe, nurturing and therapeutic setting for students who are in crisis, and who have exhibited severe behavioral issues in the typical classroom setting. St. Charles School seeks to understand the unconscious needs underlying their students' behaviors, and empower them to recognize and meet those needs in safe, responsible and respectful ways. In every situation, they strive to motivate children to want to be with their classmates. This helps them resolve issues among one another by learning to listen and respond empathetically to what others feel. They take responsibility for their own actions and responses.

The philosophy for St. Charles School's program is built on the foundation that every person is unique and has value beyond calculation and will be treated with profound respect and dignity. Children are equal to adults in terms of human worth and dignity, and are spoken to with the same respect as staff speak to one another.

Physical and emotional safety are required in order to help students access learning. The major focus at St. Charles School is to provide an environment for learning that is physically and emotionally safe for each child and their individual needs so that the whole child can develop and thrive. Emphasis is placed on recognizing which skills are particularly challenging to individual students. St. Charles School seeks to engage the cooperation of their students by practicing those skills they may grow in confidence as well as to make academic progress and gains. As much as possible, children are given choices within appropriate boundaries so that they do not feel forced or coerced in any way.

St. Charles School implements a full general education curriculum with the textbooks and supporting materials necessary for students to access learning. Laptops, Chromebooks and iPads are used to help implement curriculum. Because many of their students have emotion

regulation and sensory issues, a wide variety of sensory integration tools and activities are provided to help students learn to self-regulate. If an item is identified which might help a child access learning, every effort is made to incorporate that item into their program.

St. Charles School is staffed by a dedicated team of special education teachers, paraprofessionals, behavioral consultants and administrators with dozens of years of collective experience in transitional education.

Noteworthy Practices and Areas in Need of Refinement

Noteworthy Practices

During the monitoring visit, it had been revealed that St. Charles School includes several practices in their teaching, lessons, and expectations which are noteworthy. Such practices include:

- Integrating technology in the classroom and throughout the curriculum.
- Building upon students' strengths and knowledge while strengthening areas of weakness.
- Providing multiple spaces and physical activities to assist in refocusing and deescalating behavior.
- Combining verbal information with visual examples, as well as providing students with multiple modes of communicating their knowledge of learned material.
- Providing opportunities for horseback riding, which promotes social engagement, connection, communication, and responsibility.
- Ensuring all students feel safe and comfortable within the school environment.
- Being always mindful of possible past traumas that may impact their students' progress and performance.
- Parents and guardians are intimately involved in planning their children's educational, social, and developmental goals.
- Working in conjunction with the School Districts to keep students connected to their communities.

Overview of the Monitoring Review for Approval of Special Education Programs Process

The Monitoring Review for Approval of Private Provider Special Education Programs process ensures that students with educational disabilities have access to; can participate in; and can demonstrate progress within the general education curriculum, thereby improving student learning. The primary focus of the monitoring review is to improve educational results and functional outcomes for all children with disabilities.

Monitoring is done on a cyclical basis. During the year prior to monitoring, the New Hampshire Department of Education (NHDOE), Bureau of Student Support (Bureau) offers training to each private provider who is involved in the monitoring process. Training encompasses writing Measurable Annual Goals, Written Prior Notice, Self-Assessment, and a topic selected by the private provider based on current need. During this time, the private provider will be given the option to include a director from outside of their Local Education Agency (LEA) area to participate in the on-site file review, as well as at least one special education administrator from another private school who has been trained in the process by the Bureau. At the beginning of the school year in which the private provider is being monitored, the private provider will send the Bureau their completed application for renewal of Bureau special education approval/nonpublic school approval in addition to the program's policy and procedure manual and any special education forms that are used by the private program. Following a review of these documents, the monitoring team will conduct an on-site review in which student files are examined for evidence of implementation of the policies and procedures through the special education process. The Bureau will also conduct a follow-up review to verify the implementation of corrective actions as defined in the summary report.

The New Hampshire Department of Education, Bureau of Student Support review members for St. Charles School's on-site monitoring review included Rebecca Fredette, Heidi Clyborne, and Lori Noordergraaf, Assistant Director from Regional Services & Education Center, Inc.

Procedures and Effective Implementation

Each private provider must have special education procedures, and effective implementation of practices that are aligned and support the implementation of IDEA and the *New Hampshire Standards for the Education of Children with Disabilities*.

The monitoring team reviewed the following special education procedures for compliance with State and Federal regulations regarding administration, confidentiality of information, program requirements, responsibilities of private providers of special education implementation of IEPs, behavioral interventions, RSA 126-U Limiting the use of child restraint practices in schools and treatment centers, qualifications and requirements for instructional, administrative and support personnel, change in placement or termination of enrollment, physical facilities, health and medical care, photography and audio-visual recording, and emergency planning and preparedness.

Based on the review of St. Charles School's special education procedures the monitoring team determined there were **no findings of noncompliance**.

Private Provider Curriculum and Effective Implementation

As part of the review, the monitoring team looked for evidence that St. Charles School is providing students with access to the general curriculum. The monitoring team reviewed the grades K – 8 curriculum provided by St. Charles School for compliance with learning areas in Arts Education, English/Language Arts, Health Education, Physical Education, Family & Consumer Science, Information & Communications Technologies, Mathematics, Science, Social Studies, and Technology Education, pursuant to Ed 306.261(b)(1) and (2) & Ed 306.27(c).

Based on the review of St. Charles School's curriculum, the monitoring team determined that there were **no findings of noncompliance.**

Personnel

The Bureau of Special Education has reviewed St. Charles School personnel certifications using the New Hampshire Educator Information System. The review process was for educators employed during 2018 – 2019 school year.

The personnel roster that was provided by St. Charles School was compared to the data in the New Hampshire Educator Information System. Each personnel member's endorsement was compared to the subject/assignment. This process was used for personnel that hold Beginning Educator Certification (BEC) and Experienced Educator Certification (EEC). If the endorsement was appropriate to the subject/ assignment then the renewal date of the endorsement was verified to ensure that the endorsement was current.

If there was a discrepancy between endorsement and the subject/assignment, the private provider was given an opportunity to verify the data. If the discrepancy could not be resolved a finding of noncompliance was made based on Personnel Standards pursuant to Ed 1114.10(a), 34 CFR 300.18, and 34 CFR 300.156.

Based on the review of St. Charles School's personnel certifications, the monitoring team determined there were **No findings of noncompliance**.

Approval Requirements

Each private provider must meet the requirements for special education program approval pursuant to The Individuals with Disabilities Education Improvement Act (IDEA) (2004), The New Hampshire Standards for the Education of Children with Disabilities, and New Hampshire State Statutes (RSA 186-C:5, RSA 189:64). If seeking nonpublic school approval each private provider must meet the requirements of The New Hampshire Rules for the Approval of Nonpublic Schools (Ed 400, 2005).

The monitoring review for the approval of private provider special education programs includes an application with specified materials that must be submitted to the Bureau by October 15 in the year they are monitored.

Based on the review of the St. Charles School's application materials, the monitoring team determined there were **No findings of noncompliance**.

Monitoring of the Implementation of Special Education Process

Private providers are responsible for implementing the special education process in accordance with IDEA and the *New Hampshire Standards for the Education of Children with Disabilities.* The self-assessment data collection form highlights the private providers' understanding of the requirements of IDEA and the *New Hampshire Standards for the Education of Children with Disabilities* and was reviewed during the monitoring visit. Each area of compliance on the self-assessment data collection form clearly outlines whether the compliance is either a requirement of both IDEA and the *New Hampshire Standards for the Education of Children with Disabilities* or a requirement of solely the *New Hampshire Standards for the Education of Children with Disabilities* or a requirement of solely the *New Hampshire Standards for the Education of Children with Disabilities*. The private provider cites the evidence of compliance in the self-assessment prior to the monitoring visit. During the monitoring visit, the monitoring team verified the evidence of compliance based on review of the student file, using the private providers' self-assessment as a resource. In the case of student specific finding(s) of noncompliance, the sending District is cited for noncompliance, as well as the private provider.

Based on this review, the Bureau of Student Support identified findings of noncompliance with IDEA and the *New Hampshire Standards for the Education of Children with Disabilities.* The findings include the citation, the area of noncompliance, and the required corrective actions, which include timelines for demonstrating correction of noncompliance. Student specific information will not be included in the report but will be provided to the private provider and, when appropriate, a district's Administrator of Special Education.

There are two main components to the corrective actions entitled, *"Corrective Action of Individual Instance of Noncompliance"* and *"Corrective Action Regarding the Implementation of the Regulations"*. The first component, "corrective action of individual instance of noncompliance," is for any noncompliance concerning a child-specific requirement. There must be evidence that the private provider has corrected each individual case of

noncompliance, unless the child is no longer placed at the program. These areas must be corrected as soon as possible with state timelines given in the report for each area. The Bureau will return to the program, typically within 3 months of the date of the report, to verify compliance for each individual instance identified in the report. The second component, "corrective action regarding the implementation of the regulations" would typically involve the private provider's participating in professional development training to appropriate personnel with regards to areas found to be in noncompliance. The Bureau will review updated data collected after the identification of noncompliance to demonstrate that the program is correctly implementing the specific requirement. This involves a follow-up on-site review of new student files, selected typically within one year of the original on-site compliance & improvement monitoring.

Overview of the Student Specific Findings of Noncompliance

The chart below identifies the area of compliance based on student files that were reviewed by the compliance & improvement monitoring team during the onsite visit. The chart is broken down into the **compliance citations** and **area of compliance**. The compliance citations are based on the *CFR* found in the federal regulations of IDEA and the *Ed* found in *The New Hampshire Standards for the Education of Children with Disabilities*. The chart aligns the regulatory components to the numbered questions in the self-assessment. Regulatory components and self-assessment numbers are bolded in instances where noncompliance was noted by the compliance & improvement monitoring team.

The **review status** identifies the **number of files reviewed** for the self-assessment question as well as the number of files that were found to be in compliance. For example "5 out of 6 files demonstrated evidence that a copy of the procedural safeguards, available to the parents of a child with a disability, was given to the parent one time in the school year." This means that 6 files were reviewed and 5 files were found to be in compliance.

In cases where there was a finding of noncompliance for a particular student, the chart identifies the **First Stage Corrective Action of Individual Instance(s) of Noncompliance**. In the case of an individual instance of noncompliance, the corrective action would generally involve the IEP team convening to resolve the finding of noncompliance. Timelines for these corrective actions are also noted. For the First Stage Corrective Actions, the Bureau will return to the private provider program within 3 months following the program receiving written notification of noncompliance (the report) to review all student files in which there were findings of noncompliance in order to verify compliance with the corrective action stated in the report.

In cases where there was a finding of noncompliance for a particular student, the next section of the chart identifies the **First Stage Corrective Action Regarding the Implementation of the Regulation**. This section informs the private provider program of any practices or procedures which need to be corrected as well as trainings for personnel to inform them of

the corrections as a result of the findings of noncompliance. The required corrective action for the program and a timeline for the corrective action is also provided.

In cases where there was a finding of noncompliance for a particular student, the final section of the chart identifies the **Second Stage Corrective Action Regarding the Implementation of the Regulation**. Identified in this section will be the number of new student files that will be selected at the program to demonstrate correct implementation of the regulations for the section of the self-assessment in which noncompliance was found. For the Second Stage Corrective Actions, the Bureau will verify compliance through a subsequent on-site review of the new files within one year from the date of the report. **The total number of student files selected for the Second Stage Corrective Action Regarding the Implementation of the Regulation will not exceed the original number of files reviewed at the private provider program**.

Findings of Noncompliance

When determining compliance, the NHDOE reviews the currently agreed upon/signed IEP at the on-site monitoring visit. During the on-site monitoring visit there were **no files** which could not be reviewed for sections B(#2), D(#11-17), E(#18-22), F(#23), G (#24-26), H(#27), I(#29), J(#30-31), K(#32-41), L(#42), and M(#43-45) as there was no parent and/or LEA signature indicating consent / approval of the provisions of the IEP.
