

PROGRAM STANDARDS FOR CAREER AND TECHNICAL PROGRAMS

In order to offer a program at a regional career and technical center or career and technical program in a school district, the program shall meet the following standards:

1. A Regional Advisory Council shall actively review and make recommendations regarding the regional center and its career and technical programs.
2. A Regional Center shall comply with all applicable federal laws and regulations and state laws and rules.
3. The NH Career Development Frameworks shall be the basis upon which career guidance activities are designed.
4. The curriculum for a career and technical program shall be competency-based and reflect nationally-recognized skill standards for that industry.
5. Each career and technical program shall have an active Program Advisory Committee that is responsible for overseeing and directing ongoing program improvement activities.
6. Data regarding student performance, as measured by New Hampshire's Performance Indicators included in the current Federal Vocational Education Plan, shall be consistent with staff development and improvements in curriculum and instruction.
7. Resources and facilities shall allow each student to meet program objectives.
