REVISION

The product information on Del Monte's 2.0 oz squeezable fruit puree is incorrect. It is only creditable as a **1/8c serving of fruit** in CN programs not the ½ c stated on the product literature.

Two ounces by weight (ozw) of Del Monte's Squeezable Fruit puree is not quite one-quarter cup of fruit. Therefore 2.0 ozw could credit as one-eighth cup fruit. A 2.2 ozw portion of the fruit puree would count as one-quarter cup of fruit.

Please change your product information accordingly.
